**SEMESTER COURSE
ADVANCED INTERIOR DESIGN**

Version 01

Brief Descriptive Summary

Over the past 80 years Istituto Marangoni has grown and developed alongside the thriving Italian fashion and design industry. Through an exciting curriculum aimed to develop practical, creative, and business and management skills, which are subject specific, and relevant to the international fashion industry, Istituto Marangoni Semester courses offer specialist activities for participants who are looking for study abroad opportunities, or for professionals who have the desire to 'up-skill' or take a career break to study business practices in relation to the world of fashion including Brand Management, Promotion, and Buying and Merchandising.

General Information**1. Certification attained**

Istituto Marangoni Certificate

Programme Information**2. Educational & Programme Aims****Educational Aims:**

- to develop flexible approaches to programme delivery and participant support which reflect the needs and expectations of our participants;
- to provide a supportive and inclusive learning environment which will enable success for all learners;
- to develop the participants' intellectual and imaginative powers, creativity, independence, critical self-awareness, imagination and skills that will enhance global employment opportunities on graduation in all programmes;
- to establish a culture of constant improvement in learning, teaching and assessment that is anticipatory, enabling, supportive, rewarding and fully aligned with the Institutes vision and strategic objectives;
- to provide a learning experience that is informed by research, scholarship, reflective practice and engagement with the industry and the professions.

Programme Aims:

The course objective is to refresh participants' knowledge of the design of contemporary interiors, with a professional approach focusing on residential, public spaces such as hotels, clubs, and retail design environments. The course enables participants to specialise in the interior design field, with the ability to analyse international trends and the contemporary panorama of the luxury segment, interpreting design ideas with creativity and in coherence with market requirements. Participants will learn to express the philosophy of brands, developing new Home Collection spaces, through correct design representation.

3. Final Learning Outcomes**Educational Outcomes**

On successful completion of their course of study participants will be able to:

- apply skills of critical analysis to real situations within a defined range of contexts;
- demonstrate a high degree of professionalism characterised by initiative, creativity, motivation and self-management;
- express ideas effectively and communicate information appropriately and accurately using a range of media including ICT;
- develop working relationships using teamwork and leadership skills, recognising and respecting different perspectives;
- manage professional development reflecting on progress, taking action where appropriate
- find, evaluate, synthesise and use information from a variety of sources;
- articulate an awareness of the social and community contexts within their disciplinary field.

Programme Specific Outcomes

On successful completion of the programme participants will be able to:

- critically analyse their results and draw logical conclusions;
- select and define a research topic and implement a research plan using appropriate methodologies;
- exercise initiative and personal responsibility in the work environment;
- carry out further independent learning or continuing professional development.

Participants will also be introduced to the qualities needed in situations requiring initiative and personal responsibility, together with decision-making and leadership skills, in complex and unpredictable working situations.

Final Award Learning Outcomes

On successful completion of the course of study participants will be able to:

- research interior styles for various locations and areas including home collection, retail, and public spaces;
- develop a design brief and offer creative, innovative proposals in interior environments;
- create a brand identity for retail and home collection spaces;
- plan an interior design project in all its phases and represent it professionally through visual layouts;
- analyse and assess international trends in the interior design industry.

4. Teaching/Learning and Assessment Strategy

Curriculum:

The Advanced Interior Design Semester provides the necessary tools to interpret home interiors and professional layouts in commercial and public projects. The programme teaches participants how to develop a creative and emotive approach to design wellbeing through design research methodology, a key element for any professional wishing to remain up-to-date with trends. The style and themes of brands are conveyed in home collection and retail area designs by way of innovative structural, layout, colour and interior lighting design proposals, to name just a few. Selecting the materials, fabrics, colours and new furnishings is also part of the design process.

Through the analysis of design history and its evolution over time, participants are capable of identifying the styles, as well as defining a suitable response to the requirements of a company brief or specific client request. Different software are used to produce technical drawings, and views of interiors are supported by a professional presentation, expressed as storyboards and covering the whole creative process from concept development and its sources of inspiration, to the final representation of the space.

The historical evolution of interiors and the skills gained in creative research provide participants with the foundations for developing sophisticated and innovative designs in which the combination of materials, colours, fabrics and choice of furnishings come together to produce a harmonious and correct combination of interior design proposals.

Learning and Teaching Methods:

This course is based around formal lectures, workshops, seminars and self-directed study and within this structure a range of approaches to learning and teaching is employed as appropriate to the situation. Industry experienced specialists and visiting specialist lecturers (industry professionals) make valuable contributions and facilitate important links to professional practice.

Self-Directed Study – plays a major role in this programme, where participants are expected to spend time researching and analysing subject matter independently to support and substantiate taught material.

Formal Lectures – form an integral part of the programme and with formal delivery of key information to the whole cohort. At this level it is expected that participants will use the lectures as a stimulus for further study/reading.

Seminars – are used to build on themes taken from the lecture programme. Participants are encouraged to make an active contribution by sharing in the argument and debate.

Visiting Lecturers – are invited to deliver specialist lectures to enhance the delivery of the units.

Individual Tutorials – are used when individual participant work is being discussed or the guidance required is specific to one particular participant. It is especially important in the dissertation phase and may be face to face, over the telephone, via e-mail or Skype.

Small Group Tutorials – enable participants to discuss and plan their work in greater detail than is possible with larger groups. It encourages quieter participants to develop their interpersonal and communication skills and helps consolidate leadership skills in others.

Video Presentations - are used to give a more in-depth understanding of a specific issue.

Case Studies – are used for detailed discussion of real-life situations.

Demonstrations – are normally of a technical nature and are necessary in certain subject areas.

Studio / Workshop / Laboratory / Practical Sessions – may be used to enable the creative and practical skill development of the participant in an environment which simulates that of industry.

Group and Team Work – requires participants to operate as a member of a group or team and they usually have clearly identified roles. The emphasis is on collective responsibility, individual responsibility to the group and joint decision-making.

Study Trips – give participants the opportunity to go outside the institute's environment to enhance their understanding of specific subject material. If assessment is dependent on information collected whilst undertaking the study trip, the trip would be considered mandatory. The cost of study trips can be either the responsibility of the participant or on occasion included in the annual study fee. If the visit is within the city participants pay for public transport. This will be outlined at the beginning of any unit where such a trip is foreseen.

Assessment:

The assessment strategy for the programme has been designed to incorporate a variety of assessment method so to enable all participants to demonstrate their learning in a fair and comprehensive manner.

Assessment Methods:

Formative assessment is used as an interim review of participant work undertaken at key points during particular units. It provides an indicative measure of progress, allows participants to consider their work in relation to that of their peers, allowing participants to agree with staff any adjustments that are necessary to make in order to satisfy course requirements. It is designed to help improve participant performance. It does not contribute to the final unit mark. Formative assessment always makes reference to the learning outcomes and or assessment criteria of that unit.

Summative assessment

Provides an evaluation of participant progress and learning during an entire unit, generates a unit mark, constructive feedback and confirms the conditions for referral and retake.

Peer and Self-assessment requires participants to assess their own work and that of fellow participants. It encourages:

- a sense of ownership of the process of assessment;
- assists the participant to become an autonomous learner;
- helps to develop a range of transferable skills;
- makes assessment part of the learning process rather than an adjunct to it.

Portfolio Assessment is used to assess a variety of projects that have been developed throughout the unit.

Practical and Class Based Projects – allow the participants to demonstrate their understanding of a specific subject area and application of practical areas of the programme.

Written Reports are required in some study areas, where a clear and structured brief is provided and the participants are asked to submit work to be marked independently and anonymously by staff.

Formal Examinations – will be used in some subjects to permit participants to demonstrate their understanding of a subject within a constrained timeframe.

Presentations are used in some subjects to allow the participant to develop their professional communication, presentation skills and to argue critical reflection and interpret findings.

5. Course structure

Course Themes

Luxury Interior Spaces

Creative Design Process

Digital Design

Materials & Fabrics

History of Interior

Interior Lighting Design

Advanced Rendering

Trend Forecasting

6. Career Service for Semester courses

Each school has its own dedicated careers support team.

The purpose of the Career Service is to support and offer guidance to semester course participants with advice, lectures, presentations and information.

7. Course Specific Admission Requirement

Admission is based on the reasonable expectation that the participant will be able to fulfil the objectives of the programme and achieve the standard required for the award.

Admission requirements are listed below.

When considering the suitability of an applicant for a place on the programme, the Admissions team will usually take the following factors into account:

- copy of a recognised and field-related university undergraduate degree and transcript;
- the applicant's signed personal statement;
- a portfolio of work;
- a good knowledge of English language is recommended (level b2 of Common European Framework of Reference).

The Admissions Manager coordinates and supports the subject specific Programme Leader and the Director of Education in dealing with interviews and portfolio assessments (where appropriate).

(Admission requirements are subject to change in order to comply with entry requirement regulations).

8. Programme Leader Responsibilities

- Implementing the strategic direction of the courses within their programme and for co-ordinating the academic administration necessary for its successful day-to-day operation;
- chairing the Programme Committee, and arranging for such meetings of the Committee as considered appropriate;
- acting as the Chief Executive Officer to the programme. As such he/she will be responsible, within the agreed policies of the Programme Committee, and Academic Boards, for the efficient operation of the programme as approved by the Institute;
- supporting and encouraging their teaching team including PDP;
- advise the Programme Committee on its proper responsibility for the continuing development of the programme;
- liaise on behalf of the Programme Committee with all staff as appropriate;
- be empowered to take on behalf of the Programme Committee any reasonable action with respect to the proper functioning of the programme;
- recommend areas for curriculum development;
- co-ordinate the assessment schedule for the Unit and ensure that it is communicated to participants and the Director of Education;
- liaise with Student Support Officers to ensure that appropriate study support is available;
- recommend the appropriate level of resources required for the Unit and liaise with the teaching team;
- undertake training and professional development and contribute to the training of others;
- actively participate and organise Peer Support systems;
- monitor & respond to the student voice including regular meetings with the participant Rep.;
- monitor Unit and course feedback and the student voice;
- organise all areas of assessment procedures, facilitate monitoring, joint marking, internal verification;
- maintaining the quality of academic standards by supporting the rules and regulations concerning exam procedures and conduct of the participant and teaching team.

9. Student Support Strategy

Istituto Marangoni administers policies to enhance the participant experience, in an academic, practical and pastoral way:

- Programme Leaders: the first point of call to acquaint participants with regulations and issues arising on the programme;
- Student Support Officers for participant referral where appropriate;
- programme and participant handbooks;
- induction programmes for facilities including: Library, IT, online resources (where available), school facilities and media services;
- student group representatives (student voice).

Student Support Officers

A dedicated Student Support Officer is available for all participants on the programme.

For academic counselling, Student Support Officers will liaise with tutors and programme leaders to offer practical advice to resolve specific academic difficulties.

A written record of these tutorials will be kept in the participant's file for reference and to assist in the monitoring of participant progress.

For matters of pastoral care the Student Support Officers will help in:

- finding their way around;
- managing their time;
- dealing with stress;
- getting the best from their course;
- understanding and applying the school's rules;
- anything else the officers can advise on.

One-to-one appointments may be made by phone, through the receptionists or by email. Where possible participants can expect to be seen almost immediately, or contacted to arrange a suitable time.

10. Student Evaluation

Student feedback is essential to the programme development and student comments are used to enhance both the successful management of the programme and the teaching/learning strategies.

Istituto Marangoni gathers student opinion in a variety of ways, which may include the following:

- informal contact with Programme Leader and subject Tutor, through appointments with academic staff;
- Formal Student Representation;
- Semester Questionnaire;
- Final Questionnaire (at the end of a study cycle);
- NPS (Net Promoter Score) Questionnaire (at the end of each academic year).

Istituto Marangoni would prefer that on most occasions students be identified when giving constructive feedback on the course and teaching methods. There might be occasions when it is not appropriate and Istituto Marangoni recognizes this exception. In these instances, programme teams and central support services will ensure that anonymity and confidentiality is respected. In order to 'close the feedback loop' and to communicate any improvements resulting from student participation at least once every academic year, programme teams relate back to students the actions taken in response to student views. Students will be asked to respond to a series of questions, for example, if they were clear about what they were meant to be learning during the semester, if the teaching had helped them learn effectively and if they have developed new or existing skills. The data will be analysed and the Programme Leader will be required to comment on:

- key strengths and issues arising from student performance;
- key strengths and issues arising from student feedback;
- actions and improvements for the next academic year.
